Turn garden and kitchen waste into beautiful plants and tasty garden goodies!

The specially designed Sutton's ComposTumbler helps you make your own safe, natural, nutrient-rich fertiliser from organic garden and kitchen waste you might normally throw away. Best of all, it only takes two weeks!

With the Sutton's ComposTumbler your organic material heats up more quickly for faster decomposition. Daily tumbling turns the mixture to distribute the moisture build up a new heat core and expose the mix to essential oxygen. And the self contained drum means that all the nutrients stay in your compost where they should be! They don't leach into the ground like they do with messy compost piles.

What Should You Put in Your Compostumbler ?

Grass Clippings
Garden Throw outs
Wood Ashes

Kitchen Waste
Newspapers
Manure

Leaves
Sawdust
